

KTA Cashless Tolling

Enterprise TollPass Program Available in Kansas July 1, 2024

How much does TollPass cost?

Use of Enterprise TollPass program via Video/Plate Tolling is billed at \$4.95 per Usage Day with a maximum of 5 days per Rental Agreement PLUS the cost of tolls. There is no usage fee charged on days that drivers do not incur tolls.

When will I be charged for tolls & usage fees?

Toll invoices are generated after the rental end date, usually within 10 – 14 business days. We will use the same credit or debit card used on the rental for toll charges. If a rental is direct billed to a company or agency, drivers may still be responsible for the cost of tolls & usage fees and should check with their direct bill account manager for more information.

Can I use my personal toll account?

Some toll agencies will allow drivers to use personal accounts to cover tolls on a rental vehicle. Please check directly with the local tolling agency for options and requirements.

Are renters required to use our toll products?

No - but drivers are responsible for all tolls incurred during their rental. Most onsite/cash payment options have been eliminated by the tolling agencies; drivers should check with local tolling authority for the most up-to-date information on your toll payment options

Our vehicles are registered for video tolling on most roads in the US & Canada. Program options are based on Check Out location; customers renting in Kansas will be covered via video tolling if they drive through transponder areas like Oklahoma.

There is no option to pay onsite or online – all tolls will immediately post to our account and serve as drivers' consent to using our TollPass program.
